

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-7 and 22-26 are canceled.

8.(Currently Amended) A streaming media player providing content protection and digital rights management, including:

a port configured to receive a digital bit stream, the digital bit stream including:
content which is encrypted at least in part,
at least two sub-streams which have been muxed together, at least one of
the sub-streams including compressed information, and
a secure container including control information for controlling use of the
content, including at least one key suitable for decryption of at least a portion of
the content;

a control arrangement including:

means for opening secure containers and extracting cryptographic keys,
means for decrypting the encrypted portion of the content; and [The player
of Claim 4, wherein the control arrangement contains] a rule or rule set associated with
governance of at least one sub-stream or object;

a demux designed to separate and route the sub-streams;
a decompression unit configured to decompress at least one of the sub-streams,
the decompression unit and the demux being connected by a pathway for the
transmission of information;

a rendering unit designed to process decompressed content information for
rendering; and

a stream controller operatively connected to the decompression unit and the
control arrangement, the stream controller including decryption functionality configured

to decrypt at least a portion of a sub-stream based on at least one key passed from the control arrangement and pass the decrypted sub-stream to the decompression unit.

9.(Original) The player of Claim 8, wherein the rule or rule set is delivered from an external source.

10.(Original) The player of Claim 9, wherein the rule or rule set is delivered as part of the digital bit stream.

11.(Original) The player of Claim 8, wherein the rule or rule set specifies conditions under which the governed sub-stream or object may be decrypted.

12.(Original) The player of Claim 8, wherein the rule or rule set governs at least one aspect of access to or use of the governed sub-stream or object.

13.(Original) The player of Claim 12, wherein the governed aspect includes making copies of the governed sub-stream or object.

14.(Original) The player of Claim 12, wherein the governed aspect includes transmitting the governed sub-stream or object through a digital output port.

15.(Original) The player of Claim 14, wherein the rule or rule set specifies that the governed sub-stream or object can be transferred to a second device, but rendering of the governed sub-stream or object must be disabled in the first device prior to or during the transfer.

16.(Original) The player of Claim 15, wherein the second device includes rendering capability, lacks at least one feature present in the streaming media player, and is at least somewhat more portable than the streaming media player.

17.(Original) The player of Claim 11, wherein the control arrangement contains at least two rules governing access to or use of the same governed sub-stream or object.

18.(Original) The player of Claim 17, wherein a first of the two rules was supplied by a first entity, and the second of the two rules was supplied by a second entity.

19.(Original) The player of Claim 18, wherein the first rule controls at least one aspect of operation of the second rule.

20.(Original) The player of Claim 12, wherein the governed aspect includes use of at least one budget.

21.(Original) The player of Claim 12, wherein the governed aspect includes a requirement that audit information be provided.
